

SCHOOL BUS ACCIDENT INVESTIGATION & SCENE MANAGEMENT

This comprehensive, three-day course, taught by PTSI's Accident Investigation Experts, helps operations improve school bus accident scene management and develop bus accident response policies and procedures.

PTSI's unique course provides classroom instruction and hands-on field work, including photographing, scene measurement and math skills needed for accurate scene reconstruction and documentation. Participants will progress through a logical process to understand accident response readiness as it applies to their operation.

A high level of hands-on class participation will facilitate the objectives each class member brings to the course.

All attendees receive:

- PTSI's Accident Scene Management & Documentation Manual
- Accident Investigation Template
- Accident Investigation Forms

PARTICIPANT COMMENTS

- *Very informative, helped us realize how unprepared we were for any event, minor or catastrophic. The course was very easy to follow and comprehend.*
- *What I liked best was how to make up a safety team and how to retrain a bus driver so we can prevent a serious accident.*
- *Great way to kick off Accident Investigation Skills. Left us starving for more.*
- *Will greatly impact our future accident management!*

Course fee: \$435
